Results For:

Code	Test Name	Result / Notes	Reference Values/Key
MB2S	Total Salivary SIgA	14 Depressed  1. Secretory IgA (SIgA) is secreted by the various mucosal surfaces. It is mostly a dimeric molecule. Less than 2% of Saliva is of serum origin. The secretory component of SIgA stabilizes it against enzymatic and bacterial degradation. 2. The main functions of SIgA include Immune Exclusion, Viral and Toxin Neutralization, Plasmid Elimination, and Inhibition of Bacterial Colonization. SIgA immune complexes are not inflammatory to the mucosal surfaces.	Normal: 25-60 mg/dl Borderline: 20-25 mg/dl
